At the close of the banquet the bridal party and friends withdrew to the reception room where Fritz Bachor, in his inimitable style, gave the old songs which have endeared themselves to all hearts, of love and home.

The sports, held on the baseball grounds on Monday afternoon, were keenly contested, and proved a popular attraction. Several of the events were keenly contested, and it is pleasing to see such an aggregation of young athletes in our community.

Rain, and still more rain. The crops are coming along in fine shape, and as far as moisture is concerned, there is no cause for worry this season. The rain has been general throughout the west, and has been exceptionally heavy in Southern Alberta, where considerable damage has been done by washouts and rivers overflowing their banks.

A well attended meeting of the Golf Club was held in the Bank of Commerce chambers on Friday evening. The club has a satisfactory membership, and with a further improvement on the hospital course enjoyable games are being played.

FUEL PROBLEM REPORT

NEED OF EDUCATING PUBLIC ABOUT USE OF ANTHRACITE

Albany.—Methods of saving the fuel problem are suggested in an interim report issued by the Dominion Fuel Board. The board was organized by order-in-council in November last, under the chairmanship of Charles Campbell, deputy minister of mines. It points out that in the interim period ending 1921 Canada's bill of imported coal exceeded the sum of \$10,000,000, and suggests that the ideal solution of the fuel problem is dependence upon our own coal resources.

The report says:

Wide range of utilization of the coals of British Columbia, Alberta and the Maritime Provinces.

Investigation into the feasibility of establishing by-product recovery cooking plants.

That coal should be utilized to supply a portion of the fuel needs of Central Canada.

Montreal Honors First Skipper in Port

L. C. S. S. Montreal bringing first passengers to Montreal, 1923 Season. 2. Captain Edmund Alkan, Commander of the Bellefleur.

Twenty years ago Montreal was but a mere calling place for ships. It had practically no modern cargo handling devices or equipment, to what shore were just wooden shacks which were actually taken down at the moment of the tide to prevent them being blown away, and much of the merchandise was stored in the open air at the mercy of the wind and weather. Now Montreal is the greatest port of Canada and it is the best located. From a mere river-side stopping place for ships, it has stepped into the front ranks of great ports, and has become equipped with the handling and storing of freight that are controlled on the continent. Despite the fact that Canada has less than 10,000,000 population, and that, for the most part, the volume of business that goes on at the American continent with the military exercises of New York.

The principal reason for Montreal's supremacy as the fact that it is nearly one thousand miles inland from the ocean, at the head of deep water navigation with direct access to the Atlantic, and that behind it is the Gulf of St. Lawrence.

This year the case was presented to Captain Edmund Alkan, of the Canadian Pacific S.S. Bellefleur who had just completed his first voyage in command. The Bellefleur left London for Montreal on April 29th, and arrived at Antwerp on Monday, arriving there four days later. The Bellefleur was the first of her nearest competitor on May 1st. The liner from the ocean, at the head of deep water navigation to reach the port in 1923, arrived two days after.
